Project Objective

The objective of this project is to develop an interactive Power BI dashboard that enables stakeholders to monitor credit card business performance through customer analytics, transaction trends, and financial KPIs.

The dashboard supports data-driven decision-making by providing real-time insights into revenue, customer behavior, transaction activity, and business performance.

Project Workflow

Dashboard Overview

The project consists of two interactive dashboards:

- Customer Dashboard
- Transaction Dashboard

Together they monitor

- Revenue
- Interest Earned
- Transaction Volume
- Customer Demographics
- Card Performance
- Weekly Trends

Customer Dashboard Insights

Key Findings

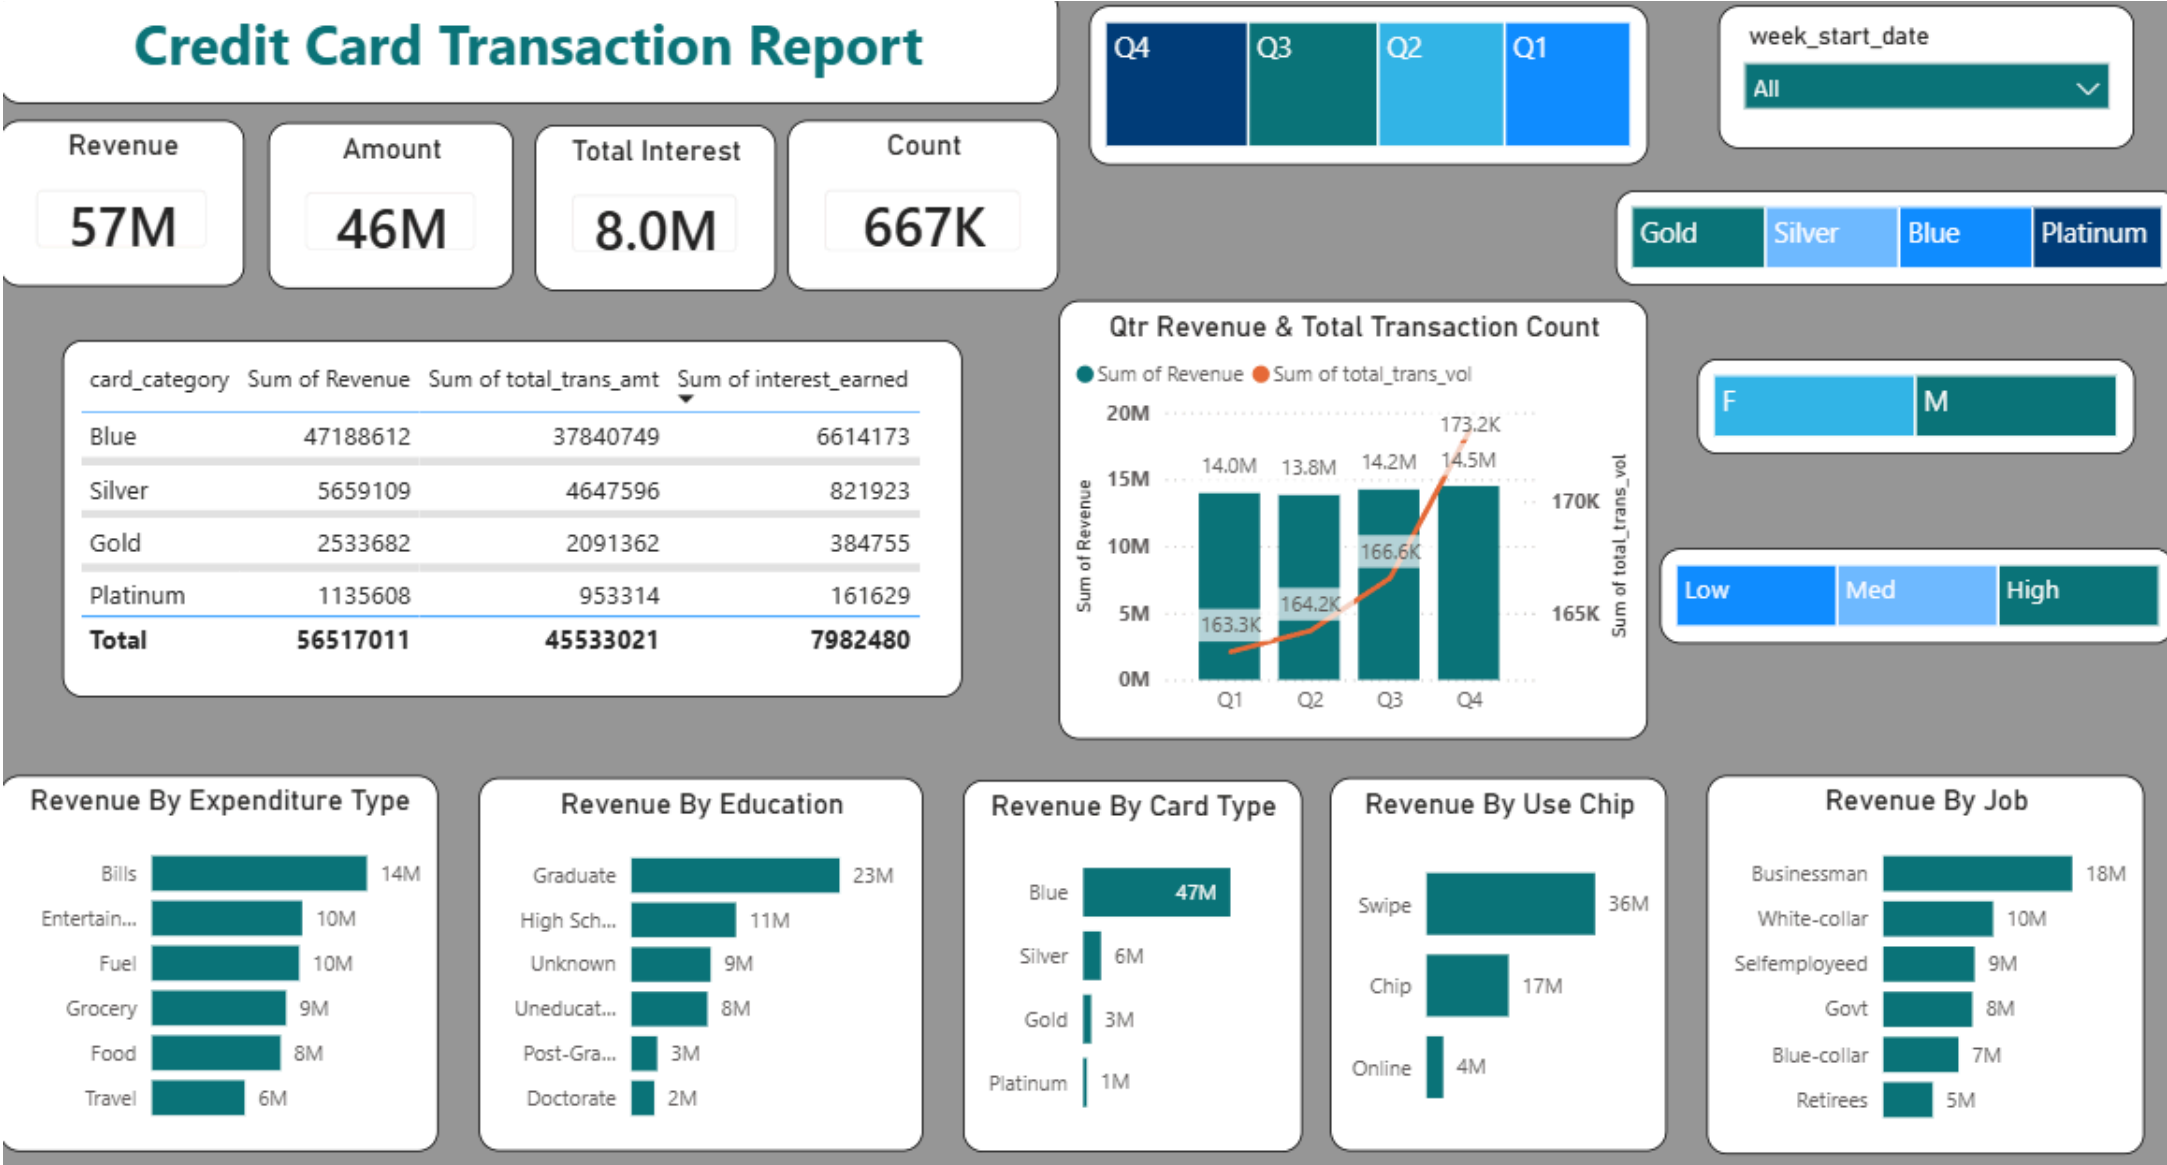

- Male customers generated higher revenue than female customers.
- Higher-income customers contributed the largest share of revenue.
- Blue and Silver cardholders accounted for the majority of customer transactions.
- Revenue distribution varied significantly across customer occupations.
- States such as Texas, New York, and California generated the highest revenue.

Transaction Dashboard Insights

Key Findings

- Overall revenue reached 57M.
- Total transaction amount exceeded 46M.
- Total interest earned reached 8M.
- Transaction volume remained consistent across the year.
- Quarterly analysis identified seasonal fluctuations in revenue.
- Card category comparison highlighted the best-performing card types.

Weekly Performance Analysis

The Week-over-Week (WoW) analysis highlights the changes in revenue across consecutive weeks, providing a clear view of short-term business performance. While revenue experienced minor fluctuations during Weeks 48–52, the overall trend remained stable with consistent customer transaction activity. A significant improvement was observed in Week 53, where revenue increased by 28.77% compared to the previous week, indicating stronger customer engagement and higher transaction volumes. This analysis enables stakeholders to monitor weekly business trends, evaluate performance, and make timely, data-driven decisions.

week_num2	Previous_week_Reveneue	Current_week_Reveneue	wow_revenue
53	933134	1201601	28.77%
52	1070439	933134	-12.83%
51	1026549	1070439	4.28%
50	980152	1026549	4.73%
49	1008777	980152	-2.84%
48	1047120	1008777	-3.66%

DAX Queries

- 1)** AgeGroup = SWITCH(
 TRUE(),
 'public cust_detail'[customer_age] < 30, "20-30",
 'public cust_detail'[customer_age] >= 30 &&
 'public cust_detail'[customer_age] < 40, "30-40",
 'public cust_detail'[customer_age] >= 40 &&
 'public cust_detail'[customer_age] < 50, "40-50",
 'public cust_detail'[customer_age] >= 50 &&
 'public cust_detail'[customer_age] < 60, "50-60",
 'public cust_detail'[customer_age] >= 60, "60+",
 "unknown"
)
- 2)** IncomeGroup = SWITCH(
 TRUE(),
 'public cust_detail'[income] < 35000, "Low",
 'public cust_detail'[income] >= 35000 &&
 'public cust_detail'[income] < 70000, "Med",
 'public cust_detail'[income] >= 70000,
 "High",
 "unknown"
)
- 3)** Current_week_Revenue = CALCULATE(
 SUM('public cc_detail'[Revenue]),
 FILTER(
 ALL('public cc_detail'),
 'public cc_detail'[week_num2] = MAX('public
 cc_detail'[week_num2]))))
- 4)** week_num2 = WEEKNUM('public
 cc_detail'[week_start_date])
- 5)** Revenue = 'public cc_detail'[annual_fees] +
 'public cc_detail'[total_trans_amt] + 'public
 cc_detail'[interest_earned]
- 6)** Previous_week_Revenue = CALCULATE(
 SUM('public cc_detail'[Revenue]),
 FILTER(
 ALL('public cc_detail'),
 'public cc_detail'[week_num2] = MAX('public
 cc_detail'[week_num2])-1))

Business Insights

Major Insights

- Overall revenue reached 57M.
- Total interest income was 8M.
- Total transaction amount reached 46M.
- Male customers generated more revenue than female customers.
- Blue and Silver cards contributed approximately 93% of total transactions.
- Texas, New York, and California generated approximately 68% of total revenue.
- Activation rate reached 57.5%.
- Delinquency rate remained at 6.06%.
- Week 53 revenue increased by 28.8% compared to the previous week. These figures are consistent with the summary in your weekly report.

Business Recommendations

Recommendations

- Focus marketing efforts on high-performing states.
- Increase promotional campaigns for premium card categories.
- Improve customer engagement to raise activation rates.
- Develop retention strategies for lower-performing customer segments.
- Monitor delinquency trends through automated alerts.
- Continue weekly KPI tracking to identify emerging trends.

Skills Demonstrated

Technical Skills

- Power BI
- SQL
- PostgreSQL
- Power Query
- DAX
- Data Modeling
- Dashboard Design
- Business Intelligence
- Data Visualization
- Financial Analytics
